1.- PRESENTACION

Learning History is essential for children to become responsible citizens in the 21st century. Nowadays, we are facing the challenge of educating them to become participative and thoughtful people, who know deeply the past and present societies. Scientific History allows us to reflect on the different experiences that human beings have gone through since the Prehistory. Consequently, both teaching and learning History help us to build a better society, far away from all the injustice and inequality of the past historical periods. Moreover, since we belong to a digital society, it will be necessary to develop didactic resources to teach History through new technologies.
